EDUCATION

Bachelor of Applied Science in Applied Computer Science; Major in Cybersecurity
Howest University of Applied Sciences 
2022 – 2025 | Belgium

Economics and Mathematics
Broederschool 
2016 – 2022 | Belgium

PROFESSIONAL EXPERIENCE

Cybersecurity Researcher and Hackers Community Growth Internship 
Intigrity

02/2025 – present | Belgium

Developed engaging hacking challenges, supported vulnerability triage, and contributed to the Hackademy platform. Maintained documentation and improved internal tools. Gained hands-on experience in cybersecurity education, platform development, and hacker community engagement.

SKILLS

- HTML, CSS, Javascript , SQL, Laravel (PHP), Java, Python, .NET (C#), Kotlin
- React.js, Tailwind CSS, Flutter, Express.js, REST Services, MySQL, Spring, JavaFX, Android SDK
- Git, Gitlab, Github, Visual Studio Code, Android Studio, JetBrains, Figma
- Security Tools (Burp, nmap, etc.)
- OWASP

PROJECTS

Honeypot 

A semester long project consisting of:

- Setting up and securing the honeypot server
- Setting up and monitoring an extensive secured logging environment
- Pentesting of other honeypot servers

Adria 

A semester-long project focused on devising a post-apocalyptic solution for Earth's inhabitants. I created a full-stack Event Planner App, enabling the creation and participation in events within designated 'safe' locations.

COURSES

TCM Practical Ethical Hacking

2023

HTB Bug Bounty Hunter Job Role Path

2025

Studying for OSCP

present

Mobile Security Project [↗](#)

Developed an Android application to demonstrate potential security risks and pentesting techniques. Besides that I created malware that could be injected into that application.
